

# SYED TAIF AHMED

Cybersecurity Analyst | SOC Analyst | Application Security | Python Developer  
Bangalore, India | +91 7061669142 | syedtaif10@gmail.com | LinkedIn | GitHub | Cyber Portfolio

---

## SUMMARY

---

Cybersecurity enthusiast and BCA graduate with hands-on experience in Python, Flask, Networking, Linux, and Web Application Security. Developed multiple cybersecurity projects including a Password Strength Checker, Phishing Email Analyzer, and Cybersecurity Portfolio using Python and Flask. Skilled in vulnerability assessment, OSINT, web security fundamentals, and security tools including Nmap, Burp Suite, Nessus, OWASP ZAP, Metasploit, Wireshark, and Maltego. Passionate about Security Operations (SOC), Application Security, and continuously improving practical cybersecurity skills through hands-on labs and real-world projects.

## SKILLS

---

### Technical Skills

**Cybersecurity:** Network Security, Web Application Security, Vulnerability Assessment, Vulnerability Scanning, OSINT, Footprinting, Scanning, Enumeration, Security Fundamentals, OWASP Top 10.

**Security Tools & Platforms:** Nmap, Wireshark, Burp Suite, OWASP ZAP, Nessus, Metasploit, Maltego, Bettercap, Ettercap, TryHackMe, Hack The Box

**Operating Systems:** Windows 10/11, Basic Linux (Kali Linux)

**Programming & Development:** Python, C#, HTML5, CSS, JavaScript, Flask, .net

**Soft Skills:** Problem Solving, Team Collaboration, Communication, Quick Learning

**Version Control:** Git, GitHub

## PROJECTS

---

### Cybersecurity Portfolio

**Technologies:** Python, Flask, HTML, CSS

- Built a responsive cybersecurity portfolio showcasing projects, technical skills, certifications, and cybersecurity learning.
- Integrated deployed security projects with live demonstrations.
- Designed a professional portfolio to present cybersecurity work to recruiters.

**GitHub Repository:** <https://github.com/SyedTaif/Cyber-Portfolio>

**Live Demo:** <https://cyber-portfolio-ugxb.onrender.com>

### Password Strength Checker

**Technologies:** Python, Flask, HTML, CSS

- Developed a Flask-based web application to evaluate password strength based on length, character diversity, and complexity rules.
- Provides real-time password security recommendations to help users create stronger passwords.
- Designed a clean and responsive user interface for better user experience.

**GitHub Repository:** <https://github.com/SyedTaif/Password-Strength-Checker>

**Live Demo:** <https://password-strength-checker-wx2n.onrender.com>

### Phishing Email Analyzer

**Technologies:** Python, Flask, Regex, HTML, CSS

- Developed a phishing email analyzer capable of detecting suspicious keywords and embedded URLs.
- Calculates a phishing risk score and classifies emails as Low, Medium, or High Risk.
- Helps improve phishing awareness through real-time analysis and recommendations.

**GitHub Repository:** <https://github.com/SyedTaif/Phishing-Email-Analyzer>

**Live Demo:** <https://phishing-email-analyzer-5lbf.onrender.com>

## Personal Portfolio

**Technologies:** HTML, CSS, JavaScript

- Developed a responsive personal portfolio showcasing web development projects, technical skills, and contact information.
- Optimized for modern browsers and mobile devices.

**Live Demo:** <https://portfolio-rho-topaz-x4owcm1yim.vercel.app/>

## EDUCATION

---

### Bachelor of Computer Applications (BCA)

Kolhan University, Jharkhand | 2021–2024 | 67.77% | *First Class*

## CERTIFICATIONS & TRAINING

---

- Cybersecurity Professional Training — Skillogic (Ongoing)
- TryHackMe Hands-on Labs

## LINKS

## LANGUAGES

---

- Hindi — Native
- Urdu — Native
- English — Professional Proficiency

## INTERESTS

---

- Cybersecurity — Actively learning cybersecurity fundamentals, networking concepts, and security principles through professional training.
- OSINT & Reconnaissance — Exploring information gathering techniques and tools such as Maltego, WHOIS, DNS Lookup, and OSINT Framework.
- Network Security — Learning about network analysis, vulnerability assessment, and security tools through practical exercises.
- Secure Development — Interested in applying security concepts and best practices while developing web applications.
